UNDERGRADUATE
INVENTOR OF THE YEAR

2025

Organized by
Institution of Engineers Sri Lanka
& IESL UIY

UIY GENERAL INSTRUCTIONS

Welcome to UIY

The Undergraduate Inventor of the Year (UIY) competition, organized by the Institution of Engineers Sri Lanka (IESL), recognizes and inspires engineering undergraduates in Sri Lanka. UIY continues the legacy of the Junior Inventor of the Year (JIY) competition, which has supported young innovators for over 40 years. UIY encourages engineering students to use their creativity and technical skills to develop innovative solutions for real-world problems.
UIY was introduced as an extension of the JIY competition, providing a dedicated space for university-level innovators. It has grown into a nationally recognized event, attracting top engineering students from universities across Sri Lanka. The competition fosters collaboration, idea refinement, and interaction with industry experts and academic leaders. With a strong emphasis on research and engineering excellence, UIY continues to shape the next generation of engineers.

Organizers

The UIY competition is a prestigious event organized by the Institution of Engineers Sri Lanka (IESL). As the primary organizer, IESL is deeply committed to fostering a culture of innovation among university students by encouraging future engineers to think beyond conventional boundaries. Through IESL-UIY, it contributes to the overall advancement of next-generation engineering in Sri Lanka.

JIY/UIY 2025 Theme

JIY and UIY 2025's major focus areas include digital transformation, human-machine interaction, and entrepreneurship, but participants are encouraged to explore beyond this and develop next-generation engineering solutions.

Eligibility

The UIY competition is exclusively open to the University of Peradeniya, University of Moratuwa, University of Ruhuna, South Eastern University of Sri Lanka, University of Jayawardhanapura, University of Jaffna, and Open University of Sri Lanka engineering students in Sri Lanka.

Path to UIY

Group Consistency
UIY inventors can participate in group projects with a maximum of 6 members.

Application Process

To be eligible for participation, students must be registered undergraduates of one of the universities mentioned under the "Eligibility" title and hold student membership with IESL (competitors should obtain IESL membership by July 2025).

Interested applicants must submit their applications through the IESL-UIY website (https://uiy.iesl.lk) by July 31, 2025. The following documents should be submitted during the registration.

1. Application
2. Project proposal (maximum 3 pages; refer to the document Report Format)
3. A declaration letter from the head of the department. This verification letter should objectively detail the student's level of independence and originality in their project, clarify the advisor's (supervisor's) role, sponsors' information (if applicable), and information regarding the related publications (if applicable).

Preliminary competition

The following materials are required to be submitted prior to the preliminary competition (the submission dates will be announced after the registration):

1. A 3-minute video of the invention
2. A brochure of the invention
3. Competitors should be available to answer the Q&A session.

- *The number of additional rounds will be decided accordingly by considering the total number of initial submissions. If there will be more than one preliminary round, the progress of the invention will be evaluated.*

Final competition

The final competition will be a physical event held in October 2025. This event will consist of the selected number of inventions, with a maximum of six inventions competing.

The following materials should be submitted prior to the final competition (the submission dates will be announced after the preliminary competition):

- A physical prototype of the invention
- A project report (maximum 10 pages)
- A video clip, that markets your product
- A Q&A session will be held regarding the invention conducted by the judging panel.

Evaluation Process

Judges will evaluate projects based on originality and creativity; social, local, and global impact; execution of the idea into a working model; feasibility to implementation or commercialization; and innovation demonstration.

Reasons for unsuccessful application

- Innovation uses dangerous and unsafe materials and conditions, and is unsafe to handle.
- Innovation that can cause harm to humans and animals.
- Innovation violates research ethics
- Models of existing products and processes.

- Products/models that contain/use live specimens without obtaining ethical clearance.
- Products/models that contain/use firearms.

Awards

The UIY Competition plays a crucial role in connecting undergraduate inventions with industry demands. By offering a platform for students to pitch their innovative ideas, the competition not only recognizes young inventors but also provides them with expert guidance.

This initiative helps enhance the professional and personal skills of participants, ensuring their projects gain industry value and real-world applicability. Additionally, contestants benefit from workshops, networking opportunities, and even international exposure, further strengthening their potential to make a meaningful impact.

Competitors that participate become one step closer to turning their ideas into practical, marketable products, which contribute to technological and industrial growth.

In addition to island-wide recognition and the UIY award certificates, UIY winners will receive a financial award of 150 000 LKR for first place, 125 000 LKR and 100 000 LKR for second and third place, respectively.
